Personal description

Software developer since 2018 with extensive experience in both frontend and backend development.

Frontend experience includes React, Vue, Angular, and Svelte — with React being the most frequently used, while the others were applied consistently across various projects.

Backend work focused on Node.js with Express and Python with Django.

Additional experience with Java, Go, and PHP on smaller-scale tasks.

Experience

Contractor / Senior Software Engineer

June 2025 - Present

Currently working as a contractor on projects involving the European Union and open source initiatives.

8x8 / Senior Software Engineer

March 2023 - June 2025, Remote

Led the transition from a monolithic architecture to a microservices-based system across multiple teams and initiatives.

Acted as the main developer on several critical projects, collaborating closely with engineers and managers, to align technical solutions with business goals.

Built cross-platform desktop applications using Node.js for both Windows and macOS.

Designed and developed micro frontends with React, enabling independent deployments and improved modularity.

Globant / Software Developer

May 2022 - March 2023, Remote

Led a development team in building native mobile applications for Android and iOS using React Native and Node.js, delivering tailored solutions for various clients.

Collaborated directly with clients to gather requirements, define scope, and ensure successful delivery aligned with their business needs.

Designed and developed a live sports streaming platform, handling both frontend and backend components to support real-time content delivery and scalability.

Vivajo / Software Developer

April 2021 - May 2022, Sibiu, Romania

Served as the main frontend developer, responsible for developing and maintaining multiple web applications owned and operated by the company.

Contributed to both frontend and backend development using Vue.js, Node.js, and Python, ensuring performance, stability, and long-term maintainability across products.

Contractor / Software Developer

October 2019 - Mar 2021, Pforzheim, Germany

Worked as a freelance developer on multiple projects, delivering complete end-to-end solutions.

Built a platform for managing virtual reality tours using Node.js for a German-based client, enabling content upload, customization, and tour scheduling.

Developed a centralized system for managing multiple online shops from a unified admin dashboard, using React for the frontend and Django for the backend.

Wise Systems / Software Developer

March 2019 - October 2019, Bucharest, Romania

Developed and maintained multiple web applications using Angular, Vue.js, and Node.js across various client projects.

Contributed to the development of an online school platform with test management capabilities, enhancing user experience and backend reliability.

Built a marketing analytics dashboard that visualized campaign performance and user engagement data, providing real-time insights for decision-making.

Education

Bucharest University of Economic Studies

October 2016 - June 2019, Bucharest

I studied economics and management.

About me
